

Kolpak Air Shield

Keep the cool air where it belongs and eliminate the hassles of strip curtains.

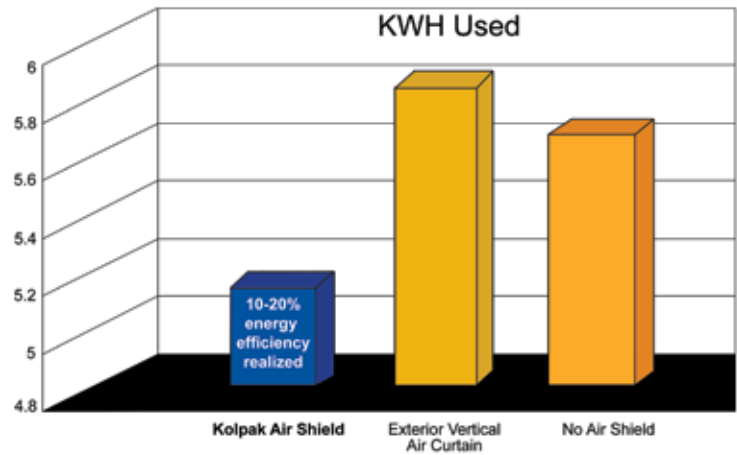

Designed to mount vertically, adjacent to the walk-in door on the interior wall surface, the Air Shield features an innovative air delivery system that channels a barrier of refrigerated air which flows horizontally across the interior side of the door opening. The Air Shield is automatically activated when the door is opened and shuts off when the door closes significantly reducing the amount of warm air infiltration into the refrigerated space (keeps the cold air in and the warm air out). Available for coolers and freezers.

UP TO 20% MORE ENERGY EFFICIENT

Kolpak Air Shield

Keep the cold air in
and the warm air out.
